

VITOR HUGO BOTELHO

Senior Platform Engineer

 +55 (11) 95957-7778  vt.botelhoo@gmail.com

 [Linkedin](#) | [GitHub](#)  São Paulo, Brazil

PROFESSIONAL SUMMARY

Platform Engineer at Itaú-Unibanco with a strong background in cloud cost optimization, automation, and data analysis. Experienced in supporting both Cloud and On-Premises environments, driving financial accountability through PDCA cycles, and evaluating FinOps/DevOps tools via Proof of Concepts. Currently developing an automation tool for applying AWS efficiency opportunities using Python, collecting optimization recommendations from tools like Cost Optimization Hub and applying changes directly to AWS accounts or generating Pull Requests for GitHub approval. Skilled in building internal knowledge through tutorials and in promoting FinOps culture across engineering and finance teams.
